### Abstract:

The present invention relates to a tricycle for physically challenged people. The object of the proposed invention is to assist physically challenged people and also help in emergency. The proposed tricycle has two driving mechanisms manual paddling (chain and sprocket) and battery operated. It has two wheels at front and one at rear. It enables two seats at front. Also paddles are provided on for both person (on both seat) but with independent drive i.e. single or both person can drive the vehicle. Second co-driver seat can be used for physically challenged person. This seat can be rotated and reciprocated which helps while seating or getting down from the tricycle. Full invention is described in detail with the help of Figure 1 of sheet 1 showing the three wheeler cycle with rotating chair.

### Complete Specification

Claims: We claim:

1. A tricycle for physically disabled people characterized in that; said tricycle having two driving mechanisms chain and sprocket and battery operated; embedded with two wheels at front and one at rear and having two seats at front; and paddles are provided on for both person (on both seat) with independent drive mechanism;
2. The tricycle for physically disabled people as claimed in claim 1 wherein said tricycle utility box at the rear is provided for keeping medical kit.
3. The tricycle for physically disabled people as claimed in claim 1 wherein GPS system is implemented which helps in direction and location.
4. The tricycle for physically disabled people as claimed in claim 1 wherein a side protection member is provided which is movable so as to ease the seating of ne
