F-LAB 2
ENGINEERING CHEMISTRY LAB
LABORATORY FIRST AID
- SMALL BURNS
Immediately plunge the burned area into ice-cold water. Gently dry and apply standard burn ointment.
- SEVERE BURNS
Do not apply any ointment but seek professional medical treatment at once.
- CHEMICAL BURNS
General chemical: Immediately wash off with plenty of water any corrosive or toxic material that contacts the skin.
Acids: Wash with plenty of water, then with very dilute sodium bicarbonate solution & finally with water to remove the acid.
Bases: Wash with plenty of water then with very dilute acetic acid solution & finally with cold water to remove the acid.
- CHEMICAL IN EYES
Wash the eyes with plenty of water to remove most of foreign matter and immediately report to the lab instructor.
- BODY CUTS
Do not continue to work even with a slight cut because foreign matter in the cut may cause a serious infection. All injuries must be reported to the instructor and treated by a qualified physician.
- FIRE
Keep yourself and others well away from the burning area of large fire. Notify your instructor immediately. Remove any containers of flammable solvent from the nearby area and turn off gas burners, if this is possible. For the most effective use of the fire extinguisher, direct its nozzle towards the base of the flames.
