**Alumini Survey For Department of Computer science and Engineering**

Name of Alumini	I have applied the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.	I have Identified, formulated, reviewed research literature, and analyzed complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.	I have designed solutions for complex engineering problems and designed system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.	I have used research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions	I have created, selected, and applied appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

**Alumini Survey For Department of Computer science and Engineering**

Name of Alumini	I have applied reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.	I have understood the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.	I have applied ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.	I have function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.	I have communicated effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**Alumini Survey For Department of Computer science and Engineering**

Name of Alumini	I have demonstrated knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.	I have recognized the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.	I have ability to use knowledge of computer systems and design principles in building the hardware and software components, products in the domain of embedded system, artificial intelligence, databases, networking, web technology and mobile computing.	I have ability to apply knowledge in various problem domains and implement innovative and suitable solutions to cater to needs of industry, business and e-governance by imbibing highest ethical and economical values.
